

OpenShift Install

Virtualization Intel VT-X/EPT
egrep 'vmx|svm' /proc/cpuinfo

محتاجين نفعل
- اتأكدوا انهم اتفعل

Command Key ↗ OC [1] محتاجين #
Pull-Secret [2]
OpenShift ↗ CRC [3]

Consol.redhat.com/openshift
Red Hat - هندخل على

لازم اكون عامل اكون على
- هنروح لا Downloads Resources

OpenShift Command-line interface (OC) * هنحمل

ونختار ال OS بتاعه

* هنزل تحت (Section) ال Tokens

هنحمل ال Pull Secret

Red Hat - كد علمنا ال OC, Pull Secret من الموقع الرسمي ل Red Hat
- باقي دلوقتي ال CRC

* هنكتب في ال browser ↗ CRC release

وهندخل على ال Repo الرسمي بتاعهم على Github

وهنختار 4.18.2 Release بتاع 2025, May 30

وبعد لما ادخل اشوف ال Release المناسب لل OS

- بعد التحميل (فتلاقني)

CRC-linux-amd64.tar.xz → tar -xvf CRC

OpenShift-Client-linux.tar.gz → tar -xvf OpenShift

Pull-Secret

نقل
المتغير

OpenShift Install

ال CRC مش بيستعملك root لازم نشتغل عليه
بـ user عادي لكن عنه بملصقات Sudo

Sudo cp oc crc-linux-2.51.0-amd64/crc
/usr/local/bin/

- كدنا قلنا ال OC + CRC وعشان نتأكد

Which crc
Which oc

Output هيك لنا

- هعمل ال CRC هكتبه
CRC Setup

CRC start -P Pull-secret.txt
CRC start -P Downloads/Downloads/Pull-secret.txt

اول لما يتخلص هيقولك ان ال OpenShift Cluster

هيديني ال URL اللي هفتح بيها ال OpenShift Dashboard

هيديني ال Username + Pass

- مش هفتح برهقو ال OpenShift هسبني يكمل تجميع

في ال Background حاجة اسمها Operators

مكن اسبني 15 أو 30 دقيقة

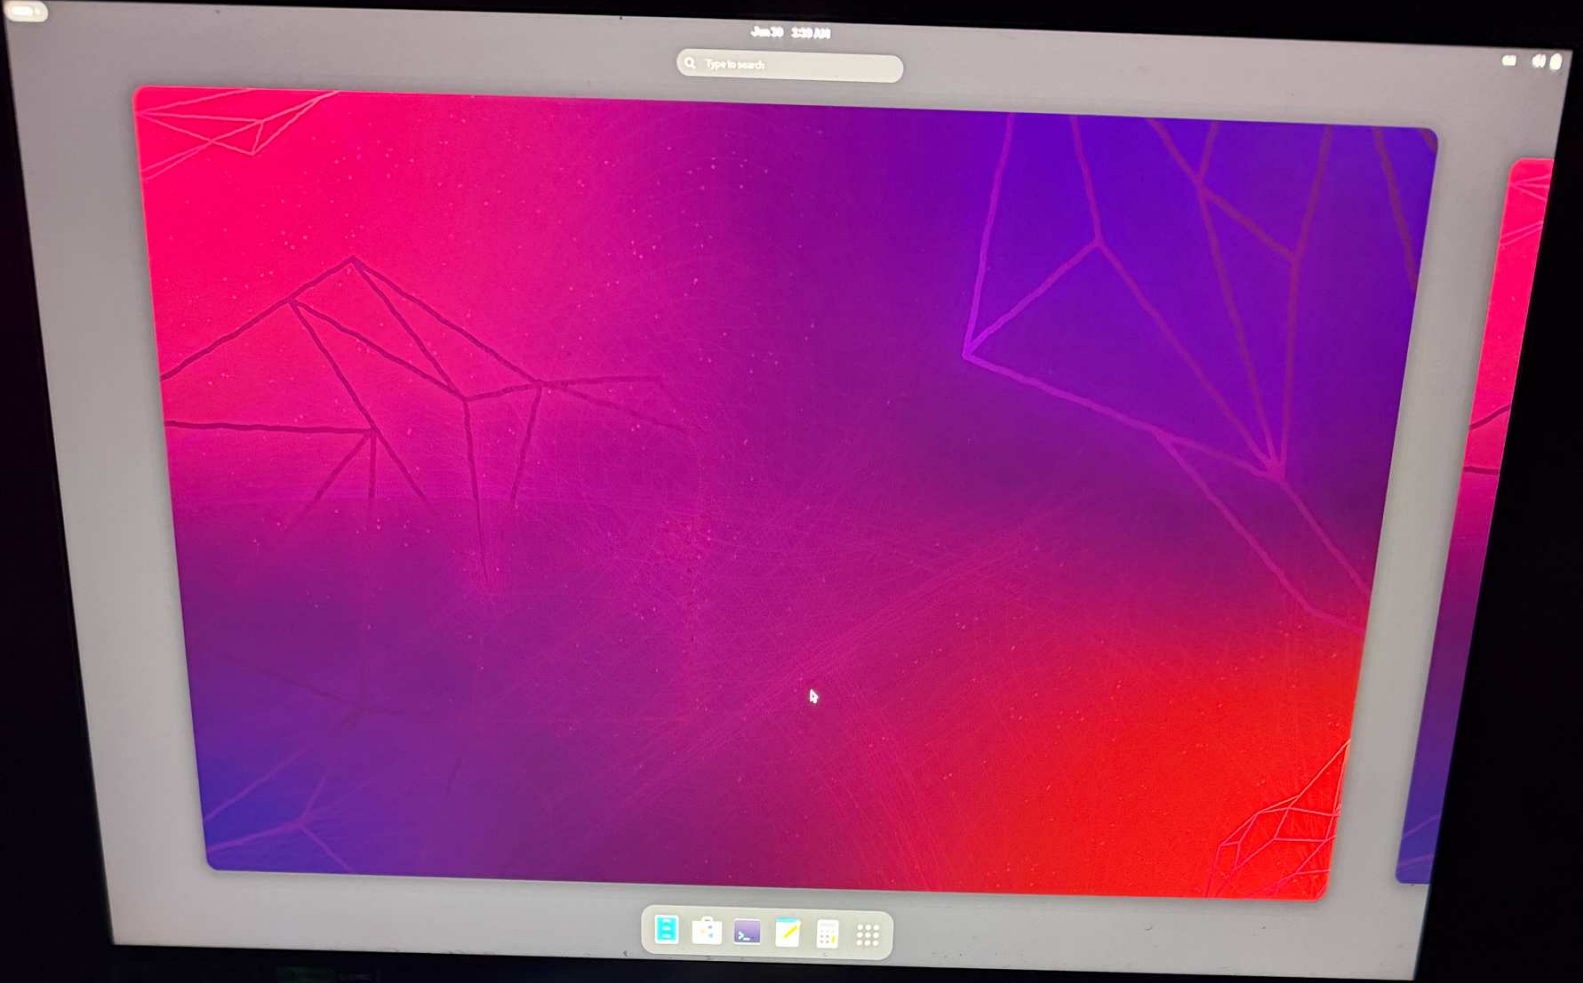

ال CRC نفسا VM بيشتغل جوا VM
CRC status هينظر كل ال States
